Заслонки для морской воды

Seawater Resistant Rubber Seal Butterfly Valve

Short Description:

Size Range: 2"-144" (50mm-3600mm)

Pressure Rating: ASME 150LB, 300LB

Temperature Range: -46°C– +200°C

Connection: Wafer, Lug, Butt Weld, Double Flange

Material: Carbon Steel, Stainless Steel , Aluminium bronze, Titanium, Monel, Hastelloy etc.

Operation: Lever, Gear, Pneumatic, Electric OP

Overview

- Rubber Seal
- Floating Seat
- Seawater Corrosion

Material

Valve body, disc and clamp ring are made of carbon steel or cast iron, for the purpose to lower the cost and to have the valve available with a high performance-price ratio. All the portions contacting with the medium are coated with ceramic etc, corrosion proof coating so as to enhance the valve capacity to resist seawater corrosion. The material in CF8M, C95800, C92200, C276, 316Ti etc also could be provided.

The shaft sleeve of valve is made of Duplex Stainless steel and uses an interference fit with the shaft hole on the body so as to effectively prevent the shaft hole against seawater corrosion.

Duplex Stainless Steel is used for the sealing face of the seat, in order to enhance both anti-corrosion capacity and wearability of the sealing.

Applicable Standards

Valve Marking: MSS-SP-25

Design & Manufacture: API 609, EN 593

Face to Face Dimension: API 609, ISO 5752, EN 558

End Connection: ASME B16.5, ASME B16.47, EN 1092, JIS B2220, GOST 12820

Test and Inspection: API 598, EN 12266, ISO 5208, ANSI B16.104

Top Flange: ISO 5211

Structure

NSEN Seawater Resistant Butterfly Valve are in Double offset design with a live-load combined packing ,e.g. V type PTFE+ V type EPDM packing, in order to make sure of no leakage during repair cycle.

This series is set with a retainer ring , which can prevent seawater from penetrating in between stem and shaft sleeve, eliminate the seawater corrosion to both and, meanwhile, prevent the muddy sand, deposit, sea creatures from penetrating into the interval, which will cause both to be occluded, to effectively enhance the reliability of the valve in its use.
